DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method for processing mass mailing by using sorting machine.

Group II, claim(s) 8 and 9, drawn to an apparatus for handling mass mailing by using sorting machine.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II does not have the technical feature that are required in Group I: the sender that includes a shrink-wrapped device wherein the mailings are inserting between the strips of film to form a strip of bags.

2. A telephone call was made to the Applicant's representative Mr. Philip G. Meyers on February 8, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
